

Operation 8095

ritētemp.

This unit is a "heating only" unit and cannot control a cooling system.

Temperature Dial

Low Battery indicator

Statement of use: The GPMG8095 can be used with most 24 volt gas, oil or electric heating and air conditioning systems, or gas millivolt heating systems. **It cannot be used with 120 volt heating systems or heat pumps.**

Operation

Turn the Temperature dial to select the desired temperature.

- Higher temperature - counter clockwise (red)
- Lower temperature - clockwise (blue)

NOTE: LED blinks when batteries are low.

Caution: Heating system will stop when batteries die.
